PROFILE

I’m Coty, a self-taught software engineer building reliable software and bringing a calm, collaborative approach to complex challenges.

From my roots in Georgia to new challenges at StockX in Michigan, I’ve built my approach around curiosity, ownership, and a relentless commitment to doing great work. Now based in Raleigh, I bring that mindset to every project.

I stay cool under pressure, learn quickly, and build positive relationships across teams. Whether working remotely or in a hybrid setting, I bring adaptability, clear communication, and a proactive approach to delivery.

ENGINEERING STRENGTHS

Software development lifecycles / System architecture / DevOps practices / Cloud computing / Security fundamentals / Database management

LEARNING

Self-taught software engineer - An ongoing practice of learning, building, and adapting to new technologies and business needs.
